

# Dreamwire Internet is optimized.

Dreamwire Internet is redundant, secure, and cloud optimized. Dreamwire Internet uses multiple ISPs for better quality and availability than a single ISP can provide.

## Benefits of Dreamwire Internet

Lower your overall costs, improve the quality of your internet, and increase the uptime of your connection.

### IMPROVED UPTIME

All providers have issues. Using multiple internet service providers allows us to limit our customers exposure to these costly service interruptions.

### IMPROVE QUALITY

Our SD-WAN technology seamlessly changes which internet provider is being used to leverage the best internet connection every time.

### LOWER COST

Dreamwire Internet aggregates customer demand to leverage better the economies of scale and pass these savings onto its customers.
